FULL STACK DEVELOPER | BACKEND

Im a passionate backend developer with 3 years of experience specializing in Laravel and web development, having worked with several reputable companies where I began my career as a front-end developer. Throughout my journey, I discovered a strong passion for backend development, where I found my niche and excelled. I thrive in problem-solving and have a natural aptitude for learning, allowing me to adapt quickly to new technologies and challenges.

My time in the industry has honed my communication and software skills, enabling me to effectively collaborate with diverse teams and stakeholders. I am enthusiastic about sharing ideas and collaborating with others to innovate and create impactful solutions.

I am particularly adept at backend technologies, including building robust APIs, optimizing database performance, and ensuring the scalability and security of web applications. My dedication to continuous learning drives me to stay updated with industry trends and best practices

I am now seeking opportunities to leverage my skills and experience in a dynamic environment where I can contribute to meaningful projects and further enhance my capabilities as a backend developer.

TECHNICAL SKILLS

• HTML	React Js	PHP
• CSS (bootstrap , sass , tailwind)	Vue Js	JSON
	Git - Github	Lravel
• Javascript (ES6 , BOM , DOM, OOP)	REST APIs	MySql DataBase

PROFESSIONAL EXPERIENCE

Front-end developer At microlab

1- built website the company's , crafting and maintaining the official website.
This website serves as the company's primary online gateway, connecting us with the world. I ensure it delivers a (positive adjective, e.g., compelling, informative, user-friendly) experience for our visitors, showcasing our brand, products, and services in the best possible light.
By keeping the website up-to-date and engaging, I help the company attract new customers, build brand awareness, and achieve its online goals.

2- I spearheaded the development of a cutting-edge mobile application system for Baytuk Company, As a key member of the development team, I took charge of designing and implementing a sophisticated dashboard using React, delivering intuitive and powerful data visualization tools.
Through meticulous planning and innovation, I crafted a dynamic React-based dashboard that empowered users to seamlessly manage and analyze real estate data. Leveraging React's component-based architecture, I implemented responsive and interactive features, ensuring a seamless user experience across various devices
My role extended beyond coding; I collaborated closely with stakeholders to understand requirements and translate complex concepts into elegant and user-friendly dashboard designs. This project honed my skills in frontend development, UI/UX design principles, and agile project management.
This experience has solidified my proficiency in React development and reinforced my dedication to delivering innovative solutions that exceed expectations. I am excited to bring this expertise to new opportunities where I can contribute to impactful projects and drive digital transformation.

3- built a dashboard to Mobile Booking App for Domestic Travel in Sudan (React):
Designed and implemented an interactive dashboard (using React) for the armada company's mobile application, streamlining trip booking for travelers within Sudan.

Full Stack developer At Tarhil

I proudly served as the official website designer and backend developer for tarhill
In my capacity as a website designer, I led the design and development of the company's official website, focusing on creating an intuitive and visually appealing user interface that effectively represented the brand identity and engaged visitors.
Simultaneously, I took charge of the backend development, leveraging my expertise in Laravel to implement essential features and optimize system performance. One of my notable achievements was integrating a unique feature into the dashboard that allowed users to send messgaes to customers. This feature not only enhanced user engagement but also showcased my ability to innovate and tailor solutions to meet specific business needs.
Throughout this role, I demonstrated my proficiency in backend technologies, including database management, API development, and server-side scripting. I thrived in a collaborative environment, working closely with cross-functional teams to ensure seamless integration of frontend and backend components.
My experience at tarhill equipped me with valuable skills in project management, problem-solving, and effective communication. I am passionate about leveraging technology to drive business growth and enhance user experiences.

Front-end developer At Tik technology

we built developed a sophisticated mobile application tailored for the real estate industry. My focus was on designing and implementing a dynamic dashboard using Vue.js, which played a pivotal role in enhancing the functionality and user experience of our system.
As the designer of the dashboard, I leveraged Vue.js to create an intuitive and responsive interface that provided users with powerful tools for managing real estate data efficiently. This included interactive visualizations, data filtering capabilities, and seamless integration with backend services.

Freelance

 built the development of a successful e-commerce store specializing in cake sales, where I played a dual role in frontend and backend development to deliver a seamless and engaging user experience.
On the frontend, I utilized php and AngularJS to build dynamic and responsive pages, ensuring a visually appealing and intuitive interface for customers to browse and purchase cakes. I integrated SweetAlert2 to enhance user interactions by displaying visually appealing and informative messages, providing a delightful shopping experience.
Simultaneously, on the backend, I leveraged Laravel to power the core functionalities of the e-commerce platform. This included managing product inventory, processing orders.
To streamline user communication and feedback, I integrated the Toastr library, enabling real-time notifications and alerts to keep customers informed throughout their shopping journey.
By adopting a full-stack approach combining AngularJS and Laravel, I successfully delivered a feature-rich e-commerce solution that exceeded customer expectations and drove business growth. This experience sharpened my skills in frontend and backend development, solidifying my expertise in creating scalable and user-friendly web applications.

built development of a sophisticated hotel management system using Laravel, designed to streamline operations and enhance guest experiences in the hospitality industry.
This comprehensive system offers a range of features tailored to meet the needs of modern hotels, including room booking functionalities and dynamic room rate management. I prioritized simplicity and ease of use, ensuring that hotel staff can efficiently manage room bookings and rates with minimal effort.
In addition to core functionalities, the hotel system incorporates various other features to optimize hotel operations, such as guest management, reservation tracking, and reporting tools for performance analysis.
My role encompassed the end-to-end development process, from conceptualization and design to implementation and deployment. I collaborated closely with stakeholders to understand requirements and deliver a solution that exceeded expectations.

built a comprehensive school management system using Laravel. It streamlines essential processes for various departments within a school.

Efficient Student and Teacher Management: The system facilitates seamless student and teacher registration, allowing for easy data management and record keeping.

Organized Class and Subject Structure: It provides a well-structured platform for managing classes and subjects, ensuring a clear curriculum overview.

Dedicated Parent Portal: The system offers a secure parent portal, fostering communication and engagement between parents and the school.

Financial Management Tools: It incorporates financial management tools, enabling efficient handling of school fees and other financial aspects.

Performance Tracking and Results Access: The system allows for student performance tracking and facilitates easy access to student results, promoting transparency and informed decision-making.

While not a large-scale system, it lays the foundation for a robust school management solution, addressing key requirements for various stakeholders.
